

KARTHICK

Computer Science Student | Seeking Software Engineering & Data Opportunities

Chennai-81 | +91 9952072343 | 23g110karthick@gmail.com | karthicka.me

LinkedIn: karthick-seven | GitHub: akarthick-dev | HackerRank: karthicka293

PROFESSIONAL SUMMARY

A highly motivated Computer Science student seeking software engineering and data opportunities to apply a strong foundational knowledge of Python, MySQL, and Linux environments. Experienced in developing automated AI agents, custom multi-modal voice assistants, and Retrieval-Augmented Generation (RAG) platforms. Eager to leverage technical skills developed through hands-on hackathons and internships to contribute effectively to organizational goals and drive professional growth.

EDUCATION

B.Sc. Computer Science

2023 – 2026

Agruchand Manmull College

TECHNICAL SKILLS

Programming & DB: Python, MySQL

AI & Frameworks: n8n, FastAPI, Groq, Ollama, Model Context Protocol (MCP)

Operating Systems: Linux

SDLC & Version Control: Git, GitHub, Agile, Waterfall

Soft Skills: Teamwork, Time Management, Problem Solving

Languages: English, Tamil

TECHNICAL PROJECTS

Retrieval-Augmented Generation (RAG) github.com/akarthick-dev/Retrieval-Augmented-Generation

- Developed an AI application utilizing Retrieval-Augmented Generation (RAG) to enhance contextual data retrieval and Natural Language Processing (NLP) capabilities.

"Sana" AI Companion

Ongoing

- Developing a personalized assistant using Groq and ElevenLabs for seamless conversational interactions and emotional support.

Sana AI — Terminal Agent with MCP Tools

github.com/akarthick-dev/sanacode

- Built a terminal-based AI agent powered by Model Context Protocol (MCP) tools, enabling natural language interaction with the local system — including file read/write, command execution, and directory listing.

INTERNSHIP EXPERIENCE

IoT Engineering Intern | Titan Leap Center (Naandi Foundation)

- Optimized resource usage and system performance via continuous IoT stream monitoring.

ACHIEVEMENTS & AWARDS

1st Place — AI Agent Creation | College Competition

- Won first prize in a college-level competition by demonstrating practical AI automation and workflow execution skills using n8n.

Best Overall — IoT Intern | Naandi Foundation

- Awarded first prize for exceptional overall performance, technical contribution, and rapid learning during the Naandi Foundation IoT internship.
